PROTECTING OUR PLANET IS OUR RESPONSIBILITY

OUR INSPIRATION

The earth inspires us. It is where we play and find true freedom. Future generations are depending on us to protect this place where we live. If we want to continue playing outdoors, then climate change is the most pressing environmental issue facing us.

MAKING MATERIAL CHANGE

At CamelBak, we're working to reduce our environmental impact for a better environment and society. By doing so, we'll make healthier products for our consumers and the earth, while continuously raising the bar to new heights.

Specifically, we're stepping up our commitments with ambitious targets to improve across key areas by 2025.

OPERATIONS

100%
INCREASE USAGE OF RENEWABLE ELECTRICITY IN OPERATIONS TO 100% BY 2030

REPURPOSE: TRANSPARENT MATERIAL CHANGE

Our RePurpose® label was designed to communicate the key attributes which contribute towards our evolving mission in creating quality, low-impact and long-lasting designs.

Products with our Repurpose® Labels and Attribute Icons are made using better materials and manufacturing processes which help diminish disposables. The system illustrates how we've improved products with the planet in mind across all categories. Choosing product within this system helps us achieve our goals and enables our customers to help in our effort toward a more sustainable future.

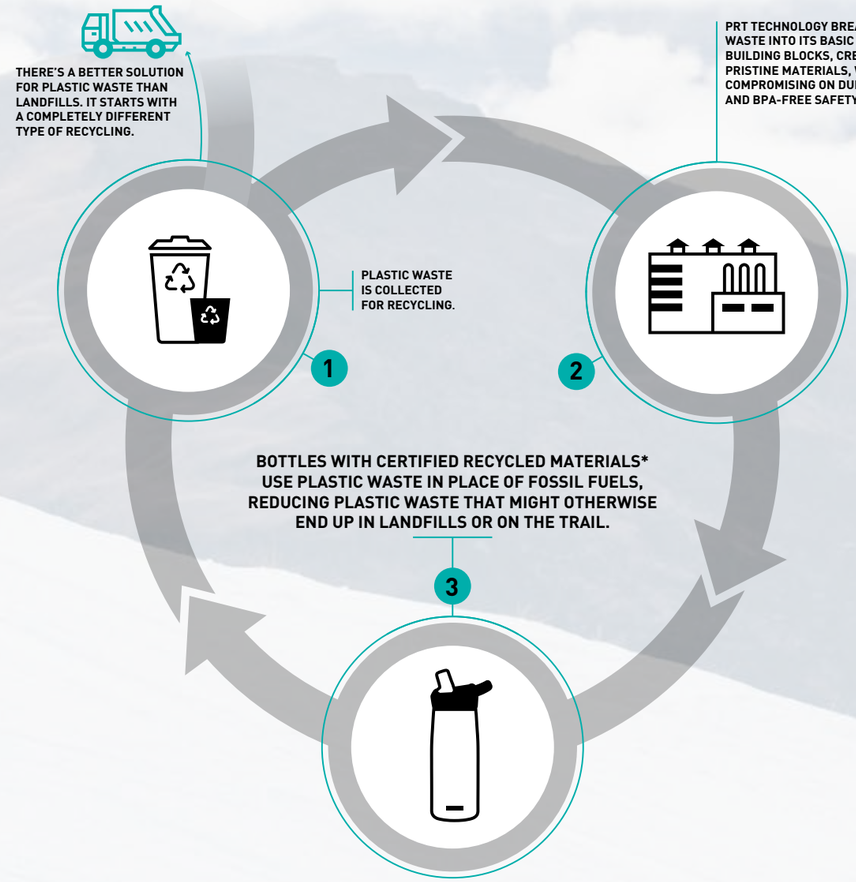
RENEW
50% RECYCLED MATERIAL

A BETTER LIFE FOR OLD PLASTICS

Breathing new life into plastic waste is harder than it seems. Much of what's recycled actually ends up in landfills or incinerators. Traditional mechanical recycling has its limits, and the recycled material it creates doesn't always have the durability needed for daily use. There is science in the solution. Tritan™ Renew is enabled by a revolutionary recycling technology called molecular recycling, which replaces fossil-based feedstocks with traditionally hard-to-recycle waste plastics. Every bottle made with Tritan™ Renew keeps waste out of our oceans and landfills, and it has a lower environmental impact than conventionally produced bottles.



*Made from certified recycled content through a third-party mass balance allocation process.
