Obōz[®]
FOOTWEAR

LOVE
HIKING

Shaped by the untamed nature of our wild backyard, we are born of Bozeman; the lessons we learn here inspire the purpose-built hiking footwear we create.

Oboz knows firsthand that when humans and nature come together, undeniable happiness is the outcome. Nothing in the world strengthens our human-nature connection like going on a hike.

In an age when life can be downright uncivilized, nature shows us the way forward. Everything we do is designed to elevate how we all live and find happiness in hiking.

Hello there,

At Oboz, our goal is to be the destination for people from around the world who want to hike. No matter if they're a newcomer or an old-time lover of the sport, we aim to bring these folks together to share a love for nature and hiking. Being from Bozeman, Montana, it is easy for us to embrace this daily in our beautiful town. When you think of it, at our core, Oboz is synonymous with community. A community that we will foster—with your help—during, before, and after the hike.

Together with you, we will build an authentic partnership and create the perfect conditions for people to experience the outdoors through the Oboz brand.

So, now's the time to hit the trails together. Thank you for walking this trail with us and working to unify people through hiking.

See you out there,

Amy

Amy Bear

WHAT WE'RE ABOUT

Get to know us a little better.

BOZEMAN BORN

Born of Bozeman, Montana, and inspired by its intricate, unpolished backyard, Oboz bridges the divide between our home and an outside world that beckons us to find our place across it all.

NON-CONFORMIST

Just like Bozeman, sometimes we can be a little rough around the edges. We seek out different perspectives but prefer to forge our own path. We believe that we have more similarities than differences and that we are more civilized, when in nature.

BUILT FOR THE ELEMENTS

We build Quality Performance Products, obsessively engineered for our backyard; the rugged and wild Greater Yellowstone ecosystem. Just like us, our footwear needs to be ready for anything. If it works here, seriously, it will work anywhere.

RESPONSIBLE

We value living up to our promises, always ready to lend a helping hand. Honesty in relationships, with great service, dedicated to education and outreach. Being responsible also means a focus on quality, taking care of trails, B-Corp and planting Trees.

Certified

Corporation™

B CORP CERTIFIED

Best for people and planet

In 2023, Oboz joined the B Corp movement. Very few footwear brands, let alone technical outdoor footwear brands, have been certified as B Corp. Because Oboz believes in the transformative powers of nature, we balance profit with our impact on the planet and the people our brand touches. Like other B Corps, we believe that people and companies can leave the world better than we found it. And we believe that doing anything less simply wouldn't be true to the trail.

OUR TRAIL TO **RESPONSIBILITY**

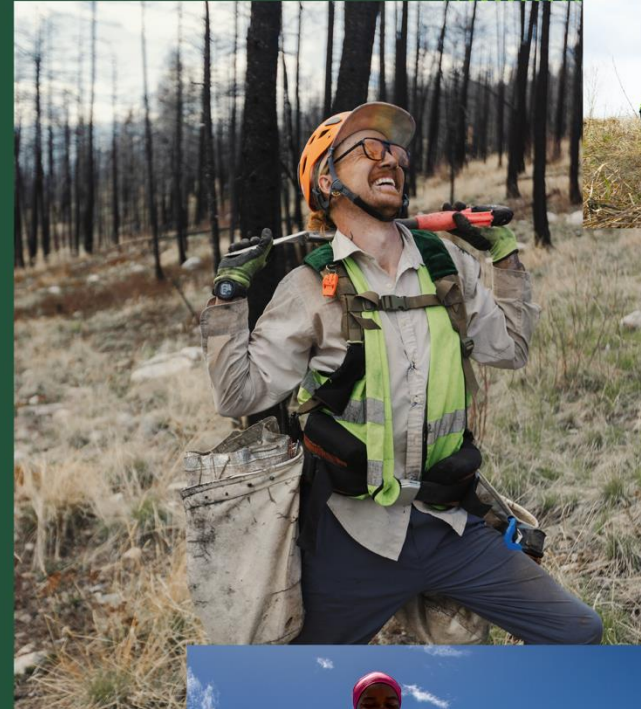

We all share the responsibility for the trail. That's why we're focusing on all of our materials and footwear. If you see our Oboz Preferred Materials label, know that this product includes a minimum of 20% environmentally preferred materials by weight.

ONE MORE TREE

Every pair helps plant trees.

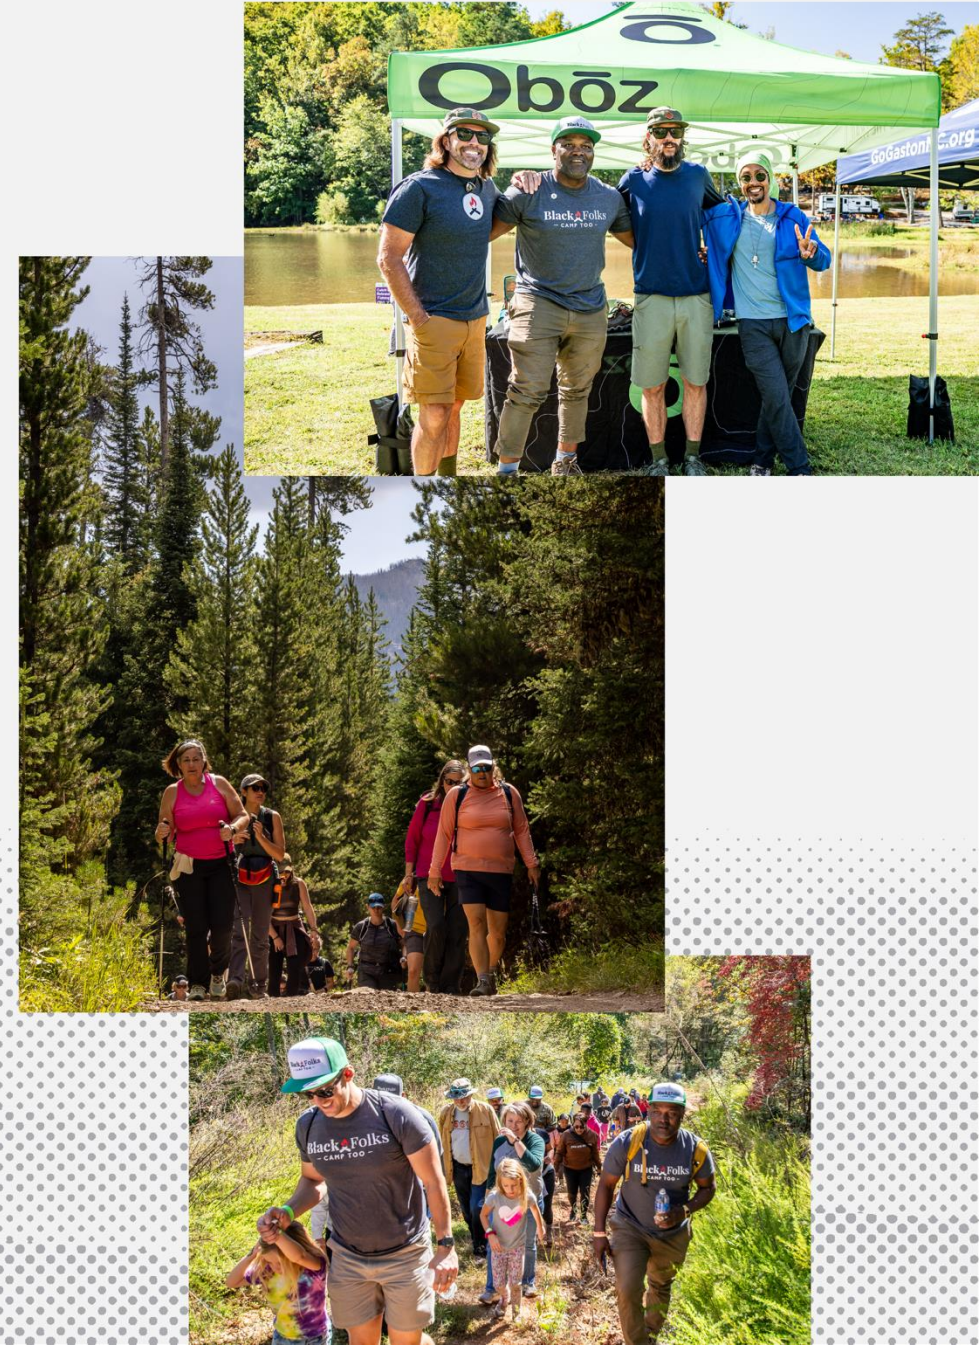

The Oboz One More Tree program helps plant trees for every pair of shoes sold, supporting global reforestation efforts and helping to combat climate change. By partnering with organizations like veritree and Trees for the Future, Oboz aims to make a positive environmental impact with each purchase.

IDEA

Inclusion, Diversity, Equity, and Access

To Unite Humanity Through The Power Of The Outdoors – this is our purpose. And uniting means actively inviting folks from all kinds of backgrounds and making sure they feel welcome and included. It also means that we work collectively to lower or remove any barriers to them being part of the outdoor community. A more inviting community is a more inclusive one, and a more inclusive community is a more robust one.

OBOZ FIT SYSTEM

Last, Insole|Footbed, Upper, Bottom

We like to think of the Oboz Fit System in terms of a four-pack: **Last, Upper, Insole/Footbed, and Bottom Package**. These components work harmoniously in a system to provide you with the best fit for your hike.

By dialing in these four components—and ensuring you have the right size—your footwear will seem to ‘disappear,’ allowing you to focus on being outside and feeding your love of hiking.

How Oboz Footwear Feels

When we talk about the feel and fit of Oboz, we have a spectrum of fits that fall between two key types: generous and athletic.

Generous footwear accommodates for extra toe splay and foot swelling during long hikes, while Athletic footwear conforms to the foot and offers agility and a nimble, precise feel.

FIT & FEEL RATING

These hiking footwear Fit & Feel rating sliders helps users find the ideal shoe by evaluating support, cushioning, and fit. Each category is rated for intended end use, ensuring optimal performance on the trail. See ratings on each footwear product page.

SUPPORT:

Stability and protection for feet and ankles while hiking on variable terrain.

Stable structured support and control for uneven, rugged, and shifting terrain.

Neutral balanced cushioning and support for natural stride on varied surfaces.

Agile lightweight responsiveness with flexible support for fast, technical movement.

CUSHIONING:

Feel or experience of the shoes underfoot while hiking.

Firm low-profile midsole, firm compound for efficient ground contact and push-off.

Balanced protective cushioning with responsive toe-off for faster-paced movement.

Plush high-stack soft cushioning delivers a forgiving impact and ride.

FIT:

Generous accommodates for extra toe splay and foot swelling during long hikes.

Athletic conforms to the foot and offers agility and a nimble, precise feel on-trail.

NEW—FALL/WINTER

Trail-ready footwear built for adventure.

KATABATIC STORM *Insulated GTX*

DEFY THE FORECAST

Fast, warm, and built to handle winter—the Katabatic Storm GTX is made to move instinctively through cold, rugged terrain. Zonal insulation targets warmth where you need it most, while the Vibram® Ice Trek II + Traction Lug outsole, GORE-TEX® Invisible Fit, and TPU Trail Chassis provide confident support. Swift, strong, and weather-ready—built to roam through wild winter weather.

GORE-TEX Invisible Fit delivers sneaker-like comfort with waterproof, windproof, breathable protection — lighter, durable, and built to perform.

Solarcore®

Solarcore® foam uses NASA Aerogel tech for ultra-light, low-loft insulation with unmatched thermal performance and long-lasting durability.

Dual-density foam cushions and supports, promoting natural motion, lasting comfort, and rebound for fast trail movement.

KINERTIA™ | ENERGY

KINERTIA™ Energy cushioning delivers lightweight, responsive comfort with compression-molded EVA engineered for quick movement and resilient trail performance.

Developed to provide the improved grip on very cold, icy, or snowy surfaces. Vibram ICETREK allows you to move and work more freely in cold areas.

CROSSCUT

STREET TRAILWEAR

A hiker that performs on the trail but doesn't feel out of place when the hike ends. Packed with real trail tech — grip, support, durability — and a design that's as easygoing as it is capable. Rugged when it needs to be, refined when it matters, and always ready for the next move. From early starts to late finishes, the Crosscut is a lock.

SAWTOOTH X *Mid Waterproof*

We know you are going to love the Sawtooth X Mid Waterproof. We've taken our adored Sawtooth II and given it a new, grippier outsole, a new Adaptive Cushioning Technology midsole for a smooth ride, and updated its styling for a boot that takes things up to the "x" degree.

SAWTOOTH X *Low Waterproof*

The Sawtooth X Low Waterproof is even more capable than our beloved original. It has a new outsole for superior traction and a new Adaptive Cushioning Technology midsole for an even smoother ride. But among all this new-ness it retains the same great fit and feel and our B-DRY waterproof technology, so you can be confident taking on the trail, puddle-filled or otherwise.

SAWTOOTH X *Low Waterproof*

The Sawtooth X Low Waterproof has all the bells and whistles of the non-waterproof version, but with the added benefit of our B-DRY waterproof and breathable technology. While the new Sawtooth X has refined styling, it retains the Cordura vents that help promote breathability and make it recognizably a Sawtooth. But your feet will recognize it as a Sawtooth first and foremost.

TRAIL *Insole*

Now anyone can upgrade their shoes with the comfort of Oboz. Our Trail Insole features ACT foam in the forefoot and heel for impact protection, while its molded medium arch provides additional support. The open cell foam throughout the majority of the insoles provides a softer rebound and additional cushioning.

UPPER - Open cell PU foam throughout, with softer heel and forefoot pods for cushioning, and a firm molded shell with a deep heel cup for stability and blister prevention, the medium-to-high molded arch support maintains foot positioning and prevent toe jam.

SIZING - XXS | US W5.5 - 6.5

FOOTWEAR TECHNOLOGY

WATERPROOF

OBOZ DRY™
WATERPROOF

Feet sweat and trails get muddy. That's why we created our Oboz DRY™ waterproof system which lets sweat escape while keeping moisture out. Improved Oboz DRY™ lining adds increased waterproofness & breathability, is 100% recycled and 25% post-industrial.

GORE-TEX
BRAND

GORE-TEX materials are engineered to keep you dry in all climates. All Obōz footwear that uses GORE-TEX product technologies offers trusted comfort and protection – with a guarantee. Proven to be durably waterproof and breathable, you'll be ready to step outside and make more of every day.

INVISIBLE FIT
PRODUCT TECHNOLOGY

GORE-TEX Invisible Fit footwear combines the true fit, feel, and comfort of your favorite athletic sneakers with the GUARANTEED TO KEEP YOU DRY promise. From a fast hike or a sneaky stroll around town, this product technology adds durably waterproof, totally windproof, and breathable protection with a long product life.

INSULATION

**FREEZE
GUARD™**

Our proprietary synthetic insulation keeps feet feeling great, with 100g, 200g, and 400g insulation levels available in different styles. Freeze Guard™ insulation is made from 100% post-consumer recycled polyester.

Solarcore®

Solarcore® foam uses the thermal advantages of NASA's Aerogel technology, the lowest density thermal insulator on the planet, infused into foam to provide unmatched performance without the excessive loft found in standard foam insulations.

INSOLES

**O FIT
INSOLE®**

The O FIT Insole® features triple-density EVA foam for all-day comfort and support. It includes medium-density foam throughout, softer heel and forefoot pods for cushioning, and a firm molded shell with a deep heel cup for stability and blister prevention. Designed with medium-to-high arch support to maintain foot positioning and prevent toe jam.

**O FIT
INSOLE®**

The O FIT Insole® Rugged uses durable PU foam and a molded shell from rear to midfoot for cushioning, support, and stability, promoting natural motion. Its deep heel cup ensures stability, heel lockdown, and blister prevention, while medium-to-high arch support keeps the foot properly positioned to prevent toe jam.

**O FIT
INSOLE®**

**Ortholite®
Eco™**

The O FIT Insole® Ortholite® ECO™ Insole features dual-density open cell PU foam for agile support and comfort. The softer X40™ Hybrid foam offers lasting cushioning and rebound, while the firmer Originals™ foam cradles the heel and arch, promoting natural motion for fast trail adventures.

MIDSOLE CUSHIONING

KINERTIA™

Engineered for versatile performance comfort, our proprietary base KINERTIA™ cushioning system is a compression molded EVA formulated for all-day wearability – providing a cushioned ride that is adaptable on varying terrains.

KINERTIA™ | +

Engineered for lightweight stability and comfort, our proprietary KINERTIA™+ cushioning system enhances our base KINERTIA™ compression molded EVA foam by infusing it with performance properties that provides a ride that is both efficient and stable.

KINERTIA™ | ENERGY

Engineered for agile performance and comfort, our proprietary KINERTIA™energy cushioning system is a compression molded EVA formulated for moving quick on the trail – providing a lightweight cushioned ride that is both responsive and resilient.

KINERTIA™ | PU

Engineered for durability and stability, our proprietary KINERTIA™pu cushioning system is a polyurethane (PU) cushioning system specifically formulated for long-term compression resistance and impact protection – providing a ride that is extremely stable and optimized to carry heavy loads.

KINERTIA™ | NITRO

Engineered for light and fast movement, our proprietary KINERTIA™nitro cushioning system is a supercritical foam (SCF) that takes our base KINERTIA™energy foam and infuses it with nitrogen – magnifying its cushioning properties to provide a ride with enhanced levels of lightweight responsiveness and resilience.

FOOTWEAR TECHNOLOGY

OUTSOLE PACKAGES

Engineered for adventures on rugged terrain, our proprietary Trail Tread HD [Heavy Duty] rubber compound offers long lasting grip. Combined with our unique outsole design elements, the wearer will experience a high degree of confidence whether on wet or dry surfaces.

KEY BENEFITS:
Durable grip & traction

Engineered for adventures in colder weather, our proprietary Trail Tread Polar outsole is a winter-specific rubber compound that is softer, optimizing traction while on frozen terrain.

KEY BENEFITS:
Frigid terrain grip & traction

MEGAGRIP

Vibram® MEGAGRIP rubber is a technical compound that offers excellent grip on both wet and dry surfaces while maintaining a higher level of durability, providing the wearer incomparable performance and confidence on extremely demanding terrain.

KEY BENEFITS:
Premium grip and durability on variable surfaces.
Vibram performance, quality, durability

ARCTIC GRIP
WET ICE TECHNOLOGY

VIBRAM® Arctic Grip rubber combines XS-TREK EVO for improved grip and durability with Arctic Grip pods for enhanced traction on wet ice. The unique polymer blend and advanced filler system in the pods are strategically placed to optimize performance in cold weather.

KEY BENEFITS:
Specifically engineered and designed to perform on wet ice.
Vibram performance, quality, durability

Engineered for a variety of adventures, our Trail Tread AT [All Terrain] rubber compound features a slightly softer rubber compound that offers versatile grip on variable terrain. Combined with our unique outsole design elements, the wearer will experience the ideal balance of adaptability and durability.

KEY BENEFITS:
Versatile grip & traction

XS-TREK EVO

Vibram® XS-TREK EVO rubber is a versatile, yet technical, compound that guarantees quality performance for multisport and outdoor activities, providing the wearer the freedom to optimize traction on a variety of surfaces and terrain.

KEY BENEFITS:
Multisurface grip and durability
Vibram performance, quality, durability

ICE-TREK

Vibram® ICE TREK 2 was developed to provide improved grip on very cold, icy, or snowy surfaces. Vibram ICETREK allows you to move and work more freely in cold areas. The soft rubber allows the compound to adhere to frozen terrain without risk of hardening.

KEY BENEFITS:
Specifically engineered and designed to perform on wet ice.
Vibram performance, quality, durability

BOTTOM PACKAGES

Designed to deliver traction, stability, flexibility, cushioning, & support.

RUGGED TRAIL

Designed and engineered for rougher trails while carrying a heavier load on back. Deep lugs provide traction on dirt and mud, while a specific lug pattern allows dirt and debris to be shed. Softer rubber compounds provide grip on rocky, uneven terrain. Firmer midsoles provide appropriate support and cushioning while preventing pack out.

BRIDGER PEAK

VIBRAM® Megagrip featuring traction lugs provides long lasting traction and durability balance. KINERTIA™pu is formulated for long-term compression resistance and impact protection. Trail Chassis bridging between rear and forefoot increase torsional stability on variable terrain. Excellent on rugged rocky terrain and off-camber trails.

BRIDGER RIDGE

Trail Tread™ HD is engineered for rugged terrain offering long lasting grip. KINERTIA™pu is formulated for long-term compression resistance and impact protection. Trail Chassis bridging between rear and forefoot increase torsional stability on variable terrain. Great for rugged trails and heavy packs.

BRIDGER MID/LOW

Trail Tread™ HD is engineered for rugged terrain offering long lasting grip. The KINERTIA™ midsole is tuned for all-day wearability. A Trail Chassis bridges between rear and forefoot increasing torsional stability on variable terrain.

SAWTOOTH X PRO

VIBRAM® Megagrip featuring traction lugs provides long lasting traction and durability balance. The KINERTIA™ midsole is tuned for all-day wearability. Engineered for a stable and durable ride.

SAWTOOTH X

Trail Tread™ HD is engineered for rugged terrain offering long lasting grip. KINERTIA™ + provides lightweight stability and comfort for an efficient and stable ride.

SAWTOOTH ASCENT

VIBRAM® XS-TREK EVO rubber allows for freedom on a variety of surfaces and terrain. The KINERTIA™ midsole is tuned for all-day wearability. Made for everything from day hikes to backpacking trips.

FIREBRAND II

Trail Tread™ HD is engineered for rugged terrain offering long lasting grip. The KINERTIA™ midsole is tuned for all-day wearability. Built for day hikes and treks across various terrain.

FAST & LIGHT

Built for moving fast on trails with agility and flexibility in mind. Lug patterns and depths are specifically design for optimal traction and friction when moving quickly on trails. Patterns also maximize the ability to shed mud without compromising grip. Softer high rebound midsoles create energy return and optimize cushion and comfort when moving at higher speed.

KATABATIC RT

Built for light and fast travel, VIBRAM® Megagrip featuring traction lugs provides a best in class traction and durability balance. KINERTIA™energy provides a lightweight responsive ride and an underfoot rockplate creates additional stability and protection. The Katabatic RT bottom will help you log trail miles fast while not even thinking about your feet.

KATABATIC WIND

Trail Tread™ rubber outsole provides grip and traction. Featuring a forked carbon-fiber plate, dual-layer KINERTIA™nitro midsole, and enhanced rocker profile components that are engineered to reduce fatigue by working together to channel energy return and provide a stable ride on technical terrain.

KATABATIC LT

Trail Tread™ rubber outsole provides grip and traction while shedding dirt and mud. Forefoot rockplate provides torional rigidity and protection. KINERTIA™energy creates resilience and cushioning for an energized ride.

KATABATIC STORM

Built for cold-weatherhikes,thisVIBRAM®IceTrek2outsole grips icy terrain with confidence. The KINERTIA™energy midsole keeps steps light and responsive, while a rockplate adds stability. The Katabatic Storm GTX bottom helps you move fast—without thinking about your feet.

ALL-TERRAIN

Made for lighter hikes and everyday wear and comfort. More subtle lug depth, larger lug area, and firmer rubber provides more durability and longer life. Specifically tuned midsole foams allow for proper support without feeling too soft underfoot.

HYALITE

A Trail Tread™ outsole provides traction and grip on the trail while the KINERTIA™ midsole provides cushioning and stability for a comfortable ride on trail or in your everyday.

OUSEL

This women's-specific bottom package provides incredible durability. Trail Tread™ AT rubber provides grip on variable terrain. The KINERTIA™ midsole is tuned for all-day wearability. A midfoot Trail Chassis bridges between rear and forefoot increasing torsional rigidity. The forefoot rockplate provides additional stability, underfoot protection and mitigates over flexion.

BOZEMAN

Trail Tread™ AT rubber features a slightly softer rubber for grip on variable terrain. The KINERTIA™ midsole is formulated for all-day wearability. Engineered for an ideal balance of adaptability and durability.
