The Katabatic Wind is our most technically advanced footwear yet. The next generation of Oboz Fast Trail hiking shoe features the Inertia of Motion (IOM) System made up of ACTNitro dual-density super critical foam and a forefoot carbon plate that work together to propel each step so you can go faster and further. Prioritizing weight and technical performance, the Katabatic Wind is for fastpackers who count ounces and FKTs.

Sawtooth X *LOW B-DRY*

\$165

The Sawtooth X Low Waterproof has all the bells and whistles of the non-waterproof version, but with the added benefit of our B-DRY waterproof and breathable technology. While the new Sawtooth X has refined styling, it retains the Cordura vents that help promote breathability and make it recognizably a Sawtooth. But your feet will recognize it as a Sawtooth first and foremost.

O FIT Insole® *Plus II*

\$35

We've taken the O FIT Insole® Plus II and changed the top sheet to emphasize the Black Folk's Camp Too message of the Unity Blaze, which means "treat everyone, everywhere, equally." Featuring Cleansport NXT odor control, cushioning pods updated with Poron Vive for fatigue mitigation, as well as our ACT (Adaptive Cushioning Technology) in the forefoot. Your purchase of the BFCT + O FIT Insole™ Plus II 'Unity Blaze' will benefit the development of Black Folks Camp Too's Digital Education Initiative.

Black Folks Camp Too's mission is to remove fears, add knowledge and invite more Black Folks to camp and enjoy the outdoor lifestyle with any and everyone.

The Other Stuff

Oboz FIT System

We like to think of our fit in terms of a four-pack: the last, the upper, the O FIT Insole® footbed, and the bottom package. It's our obsession of dialing in these four components and positioning them to our exact specifications so your footwear will "disappear" and you can focus on the adventure ahead.

Last

We design our own lasts from the makeup of real feet. The fit of a shoe highly depends on the shape and volume of the shoe last. Oboz relies on several shoe lasts to address intended and use end represent different anatomical foot types.

Upper

The support from our bio-mechanically engineered insoles and footbeds provide a better fit for the intended use.

Upper

Each upper is created specific for the style's end use, and is made from either high-quality leather, performance mesh, synthetic material, or whatever is required to achieve the desired function.

Bottom Package

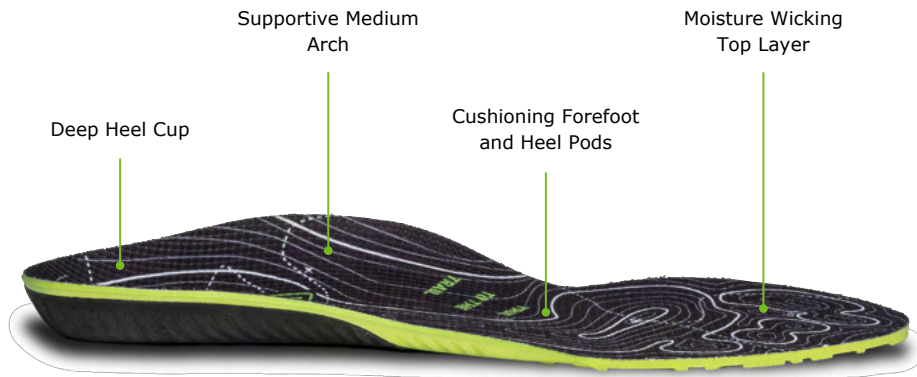

Our supportive yet lightweight midsoles deliver precise torsional stability and protection through carefully selected components, allowing for a natural flex and all-day comfort. Each outsole is designed to deliver the perfect balance of grip, traction, and durability for all types of terrain.

O FIT Insole®

Engineered for support and comfort with the intended end use in mind.

Our proprietary insole is what we're known for. Molded to match the specific shape and construction of every pair we make, this purpose-designed technology delivers the kind of fit, feel and performance that's unmatched in the industry.

O FIT Insole®

Bottom Package

Designed to deliver the traction, stability, flexibility, cushioning, and support you need.

Katabatic Wind

Engineered to keep you moving on the trail faster and farther. Featuring the IOM System along with other key features that help to reduce fatigue every step.

Whakatā

Injection molded I'm Green™ EVA and Trail Tread rubber pods create a cushioning soft yet durable ride.

Ousel

This women's-specific bottom package provides incredible durability, stability and comfort strolling down Main Street and on the trail.

Cottonwood

Rooted in sustainable design and built for durability. Featuring acceleration and deceleration zones for grip and traction on trail.

Sawtooth X

Multi-directional lugs create acceleration and deceleration zones, lug spacing helps shed mud easily, while siping traction on wet surfaces.

Burke

Multi-directional lugs create acceleration and deceleration zones, lug spacing helps shed mud easily, while siping traction on wet surfaces.

Katabatic

Built for light and fast travel, but with Oboz support and durability. The Katabatic bottom will help you log trail miles fast while not even thinking about your feet.

Sypes

Superior grip for adventures on the trail or in town. The midsole features our ACT intelligent PU™ technology to give a comfortable supportive ride wherever the day takes you.

Bridger

Great for hiking but burly enough for a multiday-day backpacking trip.

Bozeman

Delivering functional benefits that adapt to both single track and the sidewalk.

Oboz Technology

These are the technologies that set us apart.

ACT Midsole family

Oboz ACT (Adaptive Cushioning Technology) leverages proprietary EVA and PU to create lightweight midsoles for a variety of footwear with long-lasting durability, support and rebound for optimal comfort.

*Including: ACT, ACT*Plus*, ACT*Energy*, ACT*Nitro*, ACT*Eco*

Trail Tread family

5% (standard) and 20% (ECO) recycled rubber content for increased circularity and sustainability, but the same durability and grip that Oboz is known for.

B-DRY

Feet sweat and trails get muddy. That's why we created our B-DRY waterproof system which lets sweat escape and keeps moisture out. Improved B-DRY lining adds increased waterproofness & breathability, is 100% recycled and 25% post industrial.

Freeze Guard

Freeze Guard Insulation keeps feet feeling great. Made from 100% post consumer recycled polyester feels pretty good too.

IOM System

Inertia of Motion System features a forked carbon-fiber plate, dual-layer ACT*Nitro* midsole, and enhanced rocker profile. These components are engineered to reduce fatigue by working together to channel energy return and provide a stable ride on technical terrain.

Oboz Technology

Partner technologies that set up apart.

MEGAGRIP

Vibram® Rubber

New high performance rubber compounds featuring unparalleled grip on wet and dry surfaces, rugged longevity and optimal ground adaptability.

PrimaLoft® BIO™

PrimaLoft has set sustainability forward with the first-ever biodegradable*, 100% recycled synthetic fiber, for insulation and fabric applications.

REPREVE®

REPREVE transforms recycled bottles into an amazing fiber. The process embeds properties like wicking, adaptive warming and cooling, water repellent, and more at the fiber level.

CORDURA® Fabric

Constructed using high tenacity fiber technologies, weight for weight, CORDURA® fabrics are exceptionally durable.

PORON® Performance

Combining high-performance, long lasting, flexible and lightweight materials with leading-edge technologies to ensure superior comfort and performance.

Oboz Compass Partners

Partnering with those who are closely tied to our purpose of empowering the people of the world to blaze their own trail.

Black Folks Camp Too

A marketing-driven business whose mission is to increase diversity in the outdoor industry by removing generational fear, adding knowledge, and getting more Black folks outside.

52 Hike Challenge

One hike, every week for one year. A challenge where you will gain physical fitness, mental well-being, make new friends, explore new places, and connect with family, friends and yourself through nature.

Trees For the Future

Trees for the Future's mission is to end hunger and poverty by training farmers to regenerate their land, giving families the ability to transition from unsustainable farming techniques to a forest garden system. Through TTF, we plant a tree for every pair of footwear sold. Since 2007, we have planted over 5 million trees.

Continental Divide Trail Coalition

The mission of the Continental Divide Trail Coalition is to complete, promote, and protect the Continental Divide National Scenic Trail. The CDTC will do this by building a strong and diverse trail community, providing up-to-date information to the public, and encouraging conservation and stewardship of the trail, its corridor, and surrounding landscapes.

Gallatin Valley Land Trust

GVL T works to connect people, communities, and open lands through conservation of working farms and ranches, healthy rivers, and wildlife habitat, and the creation of trails in the Montana headwaters of the Missouri and Upper Yellowstone Rivers.
